

Field Notes Form

1) Describe the important characteristics of the hippocampus.

Characteristics

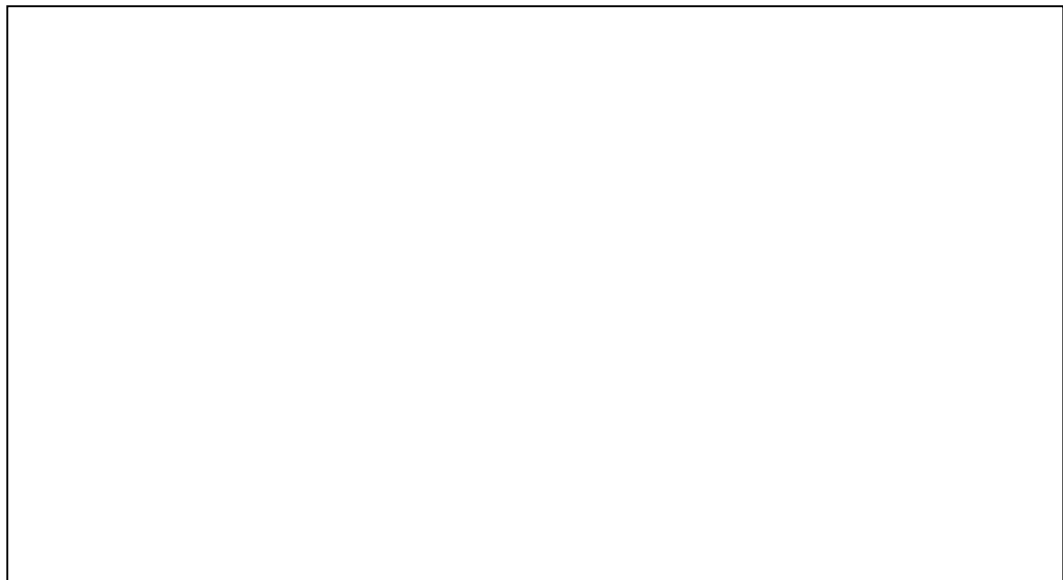

Part of Brain:	Location in brain	Shape	Function
Hippocampus			

2) What does the hippocampus look like? You may consider using analogies (what it is like) to help you describe its size and shape.

3) **Be sure to note the exact locations of the hippocampus.**

Sketch the brain and show where the hippocampus is located in the brain.

Brain Sketch

4) Describe any additional information you find about the hippocampus. Limit your findings to focus on the hippocampus. Find out how it functions, where it is located, and what would happen if it did not function properly.
